

About me

Elvin Hirwa Ndoli

A computer programmer creates the code for software applications and operating systems.

After a software developer designs a computer program, the programmer writes code that

converts that design into a set of instructions a computer can follow.

They test the program to look for errors and then rewrite it until it is error-free. After

a software developer designs a computer program, the programmer writes code that converts

that design into a set of instructions a computer can follow.

Computer programmers design, develop and test software and ensure software adheres to best
